The Bureau of Vital Statistics compiles statistical information contained in its records of birth, death, fetal death, marriage, and divorce. These data are required for public health program planning, research, population estimation, and to meet other needs of the public and private sectors.

This report presents the information most frequently requested as well as historical information which identifies trends and changes in vital events over the years.

The Texas Department of Health takes pride in publishing its vital statistics data as timely, as accurately, and as completely as modern processing methods permit.

Robert Bernstein, M.D., F.A.C.P.
Commissioner of Health

Texas Vital Statistics 1982

Natality and mortality data shown in this report are classified by county and city of residence of the mother for births and fetal deaths and by county and city of residence of the deceased for deaths. Marriages are reported by county in which marriage license was issued and divorces by county in which divorce decree was granted.

This report includes vital statistics data most frequently requested. More detailed data regarding births, deaths, fetal deaths, marriages, and divorces are available upon request to the Statistical Services Division, Bureau of Vital Statistics, Texas Department of Health, 1100 West 49th St., Austin, Texas 78756.

All birth and death rates are based on provisional population estimates published by the Bureau of the Census, U.S. Department of Commerce. The estimated population of the State as of July 1, 1982, was 15,280,000.

The Bureau of Automated Data Services tabulated the data presented in this report, and it was printed by Reprographic and Educational Services.
